

PVC Layflat Hose Introduction

★Feature:

- *Light weight with polyester yarn woven structure by one time extrusion technology.
- * Good flexibility, smooth smearing layer.
- * Innocuous & non smell and environment friendly PVC resin.

★Application:

- *Agriculture irrigation, drip irrigation, project.
- *Construction water pumping
- *Mining
- * Environment protection, industry and so on

★Pressure:

Actual MAX working pressure \leq working /tested pressure.

- *Tested pressure=working pressure on catalogues.
- *bursting pressure= 3*working pressure.
- *Tested length of hose: 2meters.

★Temperature:

-10°C ~ +70°C (non chemical condition)

★Chemical resistant:

- *UV resistant: o limited
- *Acid: + good
- *Alkali: +good
- *Solvent paint: olimited
- *Gasoline: — inferior
- *Water: ++ excellent
- *Food application: —inferior

★Service life:

1.5~2 years , in normal working hours, normal atmospheric temperature.
(no contact with sharp stone, knight etc)
